

December 12, 2020

Hi Everyone:

We managed to complete the swabbing of all residents and staff today. The specimens have been transported to the BCCDC for analysis.

Now we wait.

As much as none of us wanted to go through another swab, you were all troopers and we thank you very much for contributing to the whole group's well-being and upcoming prison break.

A sweet story to close on.... One resident had a bad asthma-like reaction and had trouble breathing and was gasping and tearing up for about 3 minutes. I was beginning to consider that she may need an inhaler to overcome this reaction and then after she caught her breath, through gasps and tears she said **"Thank you"**, with a huge smile on her face! God, I love you guys!

Hopefully we will have all the results quickly this time.

Sincerely,

Glenn
