December 3, 2020

Hi All:

Further to my letter of a few hours ago, we will be completing the swabbing tomorrow morning starting at 9:00 am.

Unfortunately, Fraser Health does not have any nurses available to assist us this time, so Dawn will be swabbing all 175 of us. In order to be able to do this in one day, box up all the swabs and send them to the lab at the end of the day, we need to do this very efficiently.

We ask that you be expecting us to come to your door. We will begin on the 5th Floor and work our way down to 1st Floor. We will have two staff members going ahead of Dawn and letting you know that you will be next. If your preference is to sit during the swab, please have your walker or a chair available so that we can do this quickly and efficiently.

This would be a good time to pray that all our results are negative and we don't have to do this again, if you are so inclined to do so.....

Thank you everyone! See you tomorrow.

Sincerely,

Glenn Bell
