Hi All:

December 9, 2020

We have not received any results from our swabs of yesterday. I am confident that they will come through this evening.

We have a SKYPE meeting set up with Fraser Health Authority for Friday at 2:00 pm to discuss taking us off of Outbreak status and a return to normal. This meeting is with 9 FHA representatives, including the Medical Health Officer, the Outbreak Response Lead and the Public Health Nurse assigned to Harrison Pointe. So I will definitely have answers for you on Friday's update.

We have a proposal for Christmas visits for the FHA that won't be reviewed until Friday now. Our thoughts are that if you take your loved ones home for Christmas dinner, upon return they will be in isolation (the same as we are now) for 7 days and then a swab and once negative, all will return to normal. Whatever "normal" is anymore – It blows me away what we all call normal now! This is in contradiction to Bonnie Henry's order but there has to be some leeway with respect to our situation and the provincial orders do not account for "controlled circumstances" – ie: we are capable of swabbing, reviewing the test results and quarantining – which is not the norm with respect to community standards.

We will make Christmas visits work. I am committed to that. Please just respect whatever guidelines we come up with so that we do not have to go through this entire process again for everyone! We need to conduct ourselves in a safe manner for everyone.

All of you have been awesome! I am so grateful – we all are – as to how respectful and compliant you have all been with this situation. It is **very** difficult. We really understand what you are going through and truthfully discuss this every single day. The isolation is terrible and harmful. Please get out and walk and meet your neighbours – wearing a mask properly – and get some fresh air!

We are a safe community. We really are. We have 100% recovery for those that were affected by this. I am so grateful that you were so strong to overcome this.

Thank you

- Glenn
