November 30, 2020

Hi All:

We are still awaiting the results of 6 swabs that we had to redo yesterday. So, until we have these results, FHA will not be making a decision on whether or not to remove our outbreak status and allowing us to return to normal.

Amica and Morgan Place in White Rock are now in outbreak as of November 26th, with all residents quarantined. There have been 20 care homes in the Fraser Health Authority that have had outbreaks since Harrison Pointe was announced on November 8th.

We want to encourage you to go for walks but wear your masks **PROPERLY**. Staff are asking me to explain once again how to wear a mask. They don't belong under your chin. They don't work when you carry them in your pocket or in your hand or hang them from your ear or leave them in your suite. It is baffling that we have to keep explaining this! It is like putting a saddle on your dog and hopping on your horse and looking for the stirrups. Yes, it is that silly

Here we go again:

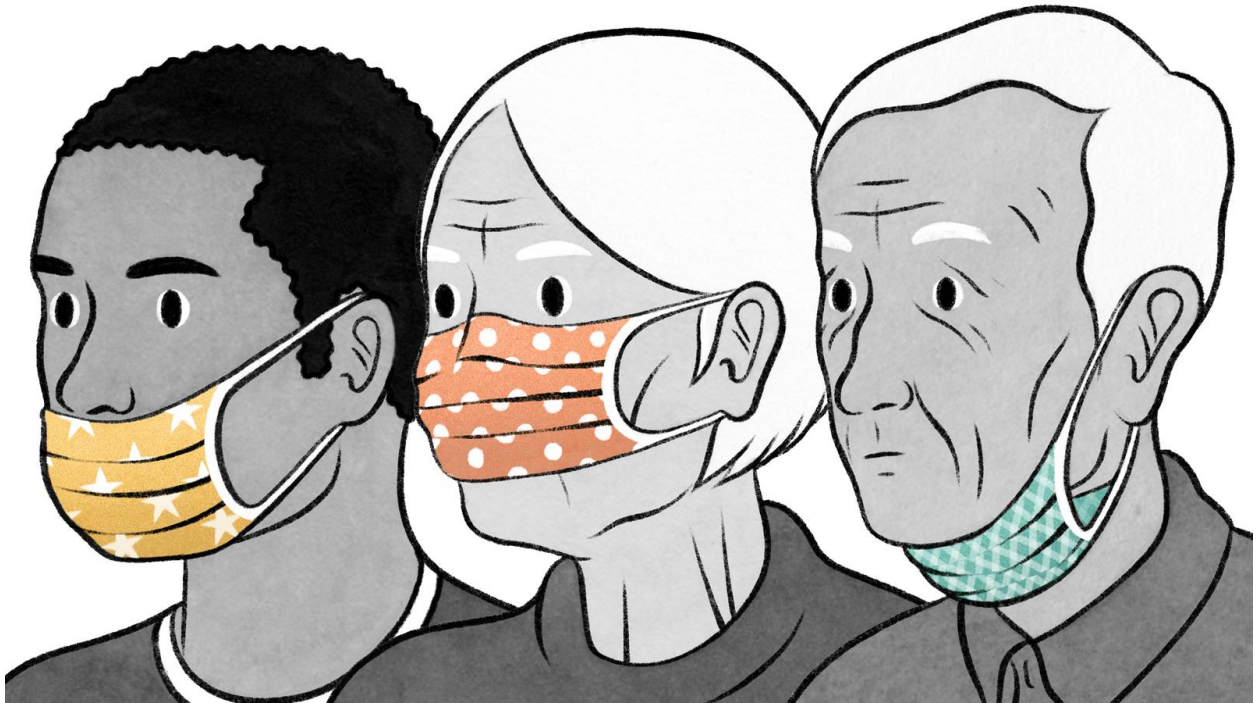

CORRECT

INCORRECT

I hope you appreciate the humour even though you (and us) are completely fed up with this pandemic.

We will have the rest of the results this evening and will forward to them the FHA as they come in .

Sincerely,

Glenn Bell
